Chemistry and Physics of Lipids, 51 (1989) 291—292
Elsevier Scientific Publishers Ireland Ltd.

Contents

Volume 51 (1989)

No. 1

S.-J. Bae, S. Kitamura, L.G. Herbette and J.M. Sturtevant (New Haven and Farmington, CT), *The effects of calcium channel blocking drugs on the thermotropic behavior of dimyristoylphosphatidylcholine* 1

A. Liav and M.B. Goren (Denver, CO), *Synthesis of 6,6'-di-O-mycoloyl- and corynomycoloyl-(α-D-galactopyranosyl α-D-galactopyranoside) via triflates* 9

P. Fahlstadius and M. Hamberg (Stockholm, Sweden), *A gas-liquid chromatographic method for steric analysis of epoxy acids* 15

A. Mellier (Poitiers, France), *Infrared study of phospholipid hydration. New thermodynamic data about the main phase transition of saturated phosphatidylcholine water multidispersions* 23

A. Savagnac, H. Aurelle, C. Casas, F. Couderc, P. Gavard, D. Promé and J.-C. Promé (Toulouse, France), *Structure determination of mycolic acids by using charge remote fragmentation* 31

M.R. Roth, F.L. Smardo Jr. and R. Welti (Manhattan and Kansas City, KS), *Analysis of dimeric species derived from the reaction of phosphatidylethanolamine with dimethylsuberimidate* 39

N. Hiramatsu, T. Inoue, M. Suzuki and K. Sato (Fukuoka, Amagasaki and Higashi-Hiroshima, Japan), *Pressure study on thermal transitions of oleic acid polymorphs by high-pressure differential thermal analysis* 47

G.R.A. Hunt and M. Kaszuba (Pontypridd, U.K.), *The effect of n-alcohols on vesicular permeability induced at the lipid phase transition temperature: a ^{1}H-NMR study* 55

Short Communication

I. Voszka, S. Györgyi and M. Bihari-Varga (Budapest, Hungary), *Effect of glycosaminoglycans and divalent cations on the thermal properties of dipalmitoylphosphatidylcholine* 67

Book Review 73

No. 2.

E. Hantz, A. Cao, R.S. Phadke and E. Taillandier (Bobigny, France and Bombay, India), *The effect of loperamide on the thermal behavior of dimyristoylphosphatidylcholine large unilamellar vesicles* 75

T. Nishiya and T.M.S. Chang (Montreal, Canada), *The use of circular dichroism active phospholipid to study lipid transfer between liposomes: effects of cholesterol and melittin on spontaneous lipid transfer*.... 83

R. Tampé, A. Winter, P. Wohlfart, J. Becker and H.J. Galla (Darmstadt, F.R.G.), *Reconstitution and electron paramagnetic resonance-spectroscopic characterization of glycophorin containing phospholipid vesicles* 91

P.P. Constantinides, L.Ghosaini, N. Inouchi, S. Kitamura, R. Seshadri, M. Israel, A.C. Sartorelli and J.M. Sturtevant (New Haven, CT and Memphis, TN), *Interaction of N-alkylanthracyclines with lipid bilayers: correlations between partition coefficients, lipid phase distributions and thermotropic behavior*... 105

M. Crestani, E. De Fabiani, B. Malavasi, M. Cancellieri, G. Galli and E. Bosisio (Milan, Italy), *Effect of natural and structurally modified bile acids on cholesterol metabolizing enzymes in rat liver microsomes*... 119

B. Maggio and R.K. Yu (New Haven, CT), *Interaction and fusion of unilamellar vesicles containing cerebrosides and sulfatides induced by myelin basic protein* 127

K.H. Cheng (Lubbock, TX), *Fluorescence depolarization study on non-bilayer phases of phosphatidylethanolamine and phosphatidylcholine lipid mixtures* 137

No. 3,4 Special Issue : Polyprenols and Dolichols

Foreword v
V.V. Veselovsky, N.Ya. Grigorieva and A.M. Moiseenkov (Moscow, USSR), *Synthesis of compounds relating to polyprenols* 147
L. Jaenicke and H.-U. Siegmund (Köln, F.R.G.), *Synthesis and characterization of dolichols and polyprenols of designed geometry and chain length* 159
T. Takigawa, K. Ibata and M. Mizuno (Okayama, Japan), *Synthesis of mammalian dolichols from plant polyprenols* 171
Y. Tanaka and H. Hirasawa (Tokyo, Japan), *Sequence analysis of polyprenols by 500 MHz ^{1}H-NMR spectroscopy* 183
L.L. Danilov, T.N. Druzhinina, N.A. Kalinchuk, S.D. Maltsev and V.N. Shibaev (Moscow, USSR), *Polyprenol phosphates: synthesis and structure-activity relationship for a biosynthetic system of Salmonella anatum O-specific polysaccharide* 191
M.J. Knudsen and F.A. Troy (Davis, CA), *Nuclear magnetic resonance studies of polyisoprenols in model membranes* 205
J.S. Schutzbach and J.W. Jensen (Birmingham, AL), *Bilayer membrane destabilization induced by dolichylphosphate* 213
W. Gibson Wood, G.Y. Sun and F. Schroeder (St. Louis and Columbia, MO and Cincinnati, OH), *Membrane properties of dolichol in different age groups of mice* 219
T. Janas, J. Kuczera and T. Chojnacki (Podgórna, Wroclaw and Warsaw, Poland), *Voltammetric analysis of polyisoprenoid-containing bilayer lipid membranes* 227
B.L. Clarke, C. Naylor and W.J. Lennarz (Birmingham, AL and Houston, TX), *Comparative studies on mannosylphosphoryl dolichol and glucosylphosphoryl dolichol synthases* 239
W.J. Jankowski, G. Palamarczyk, I. Krajewska and T. Vogtman (Warsaw, Poland), *Specificity of cellular processes and enzymes towards polyisoprenoids of different structure* 249
R.K. Keller, S.W. Nellis and L. Cuadrado-Simonet (Tampa, FL), *A rapid procedure for the separation and analysis of metabolites of the sterol and dolichol pathways* 261
D.C. Crick, R.T. Rymerson, K.K. Carroll and J.W. Rip (London, Canada), *Metabolic labelling of polyisoprenoids using tritiated water* 269
W.L. Adair, Jr. and N. Cafmeyer (Tampa, FL), *Characterization of dolichyl diphosphate phosphatase from rat liver* 279
